1. As used in this act:

a. The words "the board" mean the New Jersey Board of Nursing created by this act.

b. The practice of nursing as a registered professional nurse is defined as diagnosing and treating human responses to actual or potential physical and emotional health problems, through such services as casefinding, health teaching, health counseling, and provision of care supportive to or restorative of life and well-being, and executing medical regimens as prescribed by a licensed or otherwise legally authorized physician or dentist. Diagnosing in the context of nursing practice means the identification of and discrimination between physical and psychosocial signs and symptoms essential to effective execution and management of the nursing regimen within the scope of practice of the registered professional nurse. Such diagnostic privilege is distinct from a medical diagnosis. Treating means selection and performance of those therapeutic measures essential to the effective management and execution of the nursing regimen. Human responses means those signs, symptoms, and processes which denote the individual's health need or reaction to an actual or potential health problem.

The practice of nursing as a licensed practical nurse is defined as performing tasks and responsibilities within the framework of casefinding; reinforcing the patient and family teaching program through health teaching, health counseling and provision of supportive and restorative care, under the direction of a registered nurse or licensed or otherwise legally authorized physician or dentist.
